

Selected feedback comments from participants in FTSA workshop

- Found it very interesting to apply the concept of ethical production to the South African context in a realistic manner (i.e. legislation, constraints and possibilities).
- Workshop session with questions was very useful – good to get the collective input which we don't often have a chance to experience.
- Enjoyed the 2 case studies. Challenges highlight what needs to be done!
- Case studies a 'dose of reality' about the place of ethical trade in complex development challenges.
- Insight into the drivers and status of Ethical trade.
- Useful to understand that there are still differing levels of knowledge in a room of people working in that area, means that there is still work that needs to be done.
- Workshop generated interesting discussion. Get-togethers too infrequent. Diverse gathering.
- I personally will spend more time on lobbying big business (retailers) to act more ethically and support producers as oppose to pressurising them. Thank you.
- Thanks again for the invite to the workshop. I found it very educational and I was really glad to be able to debate question 4 with a lot of knowledgeable people.
- Learnt how complicated/complex ethical trade is. Enjoyed the sharing. Great opportunity to network.
- Interesting information and learning about other stakeholders involved with the ethical trade in S.A. Thank you.
